

How to take down a Jumping Castle

1. Make sure the inflatable is completely empty of all Children.
2. Switch off the electrical supply and disconnect the blower.
3. Open all deflation zippers.
4. Allow the inflatable to completely deflate
5. Straighten the base. Fold walls in neatly towards centre.
6. Fold into thirds lengthwise.
7. Roll the unit slowly and as tightly as possible towards the outlet zipper, forcing the air out.
8. Secure the bag with the fastening ropes.
9. Do not fold it if the inflatable is wet. Please let it dry first by inflating the unit and letting it dry itself for at least half an hour. Please do not stored wet for any length of time.
